# Matrix Booking Insight

Real-time workplace analytics for smarter space management

Enjoy rich insights into how your buildings and resources are being used, so you can plan smartly for the future, and keep everyone safe and comfortable today. Matrix Booking's analytics show you what happened in the past, what's happening now, and what's likely to happen next. Use this data to provide the right blend of workspace to encourage people into the office and help them be more productive.

### Micro and macro data

See booking, utilisation, and occupancy data across your estates, then drill down to see individual regions, buildings, floors, zones, rooms, and desks.

### Report on any resource type

As well as desks and meeting rooms, Matrix Booking lets you set up and report on any resource, such as phone booths, lockers, or car parking.

### Add occupancy sensor data

Gain richer occupancy and utilisation insights by adding occupancy sensors and people-counters to your desks, meeting rooms, and other workspaces.

### Spot trends to shape your offices

Understand how and when you'll need more or different resources, by monitoring trends against building capacity and resource quantities.

### Environmental dashboards

Add environmental sensors to your buildings to remotely monitor temperature and air quality, so you can provide safe and comfortable workspaces.

### Visitor and attendance reports

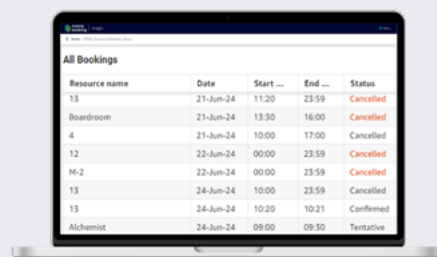

See who's in your buildings now, and who plans to come in. Use this data to improve office planning and monitor your hybrid working policy.

## CORE dashboards

### Building usage

Use this dashboard to better understand planned vs actual attendance. Monitor how your hybrid working policy is working and see when and where buildings are busy.

### Booking history

See all of your booking data in one place. This enables you to compare against other data sources and export it for your own bespoke reporting.

### Resource usage

Identify wastage and see where desks, rooms, and other resources could be better utilised. See which resources are popular and whether teams have the right space.

# Why choose us?

Matrix Booking is a modular and scalable product that allows you to manage and book any workplace resource. Get peace of mind from using a secure, mature, and well-established product that will evolve with you. You'll have access to personalised and proactive support, and be part of our workplace management community.

- Reliable
- Secure
- Scalable

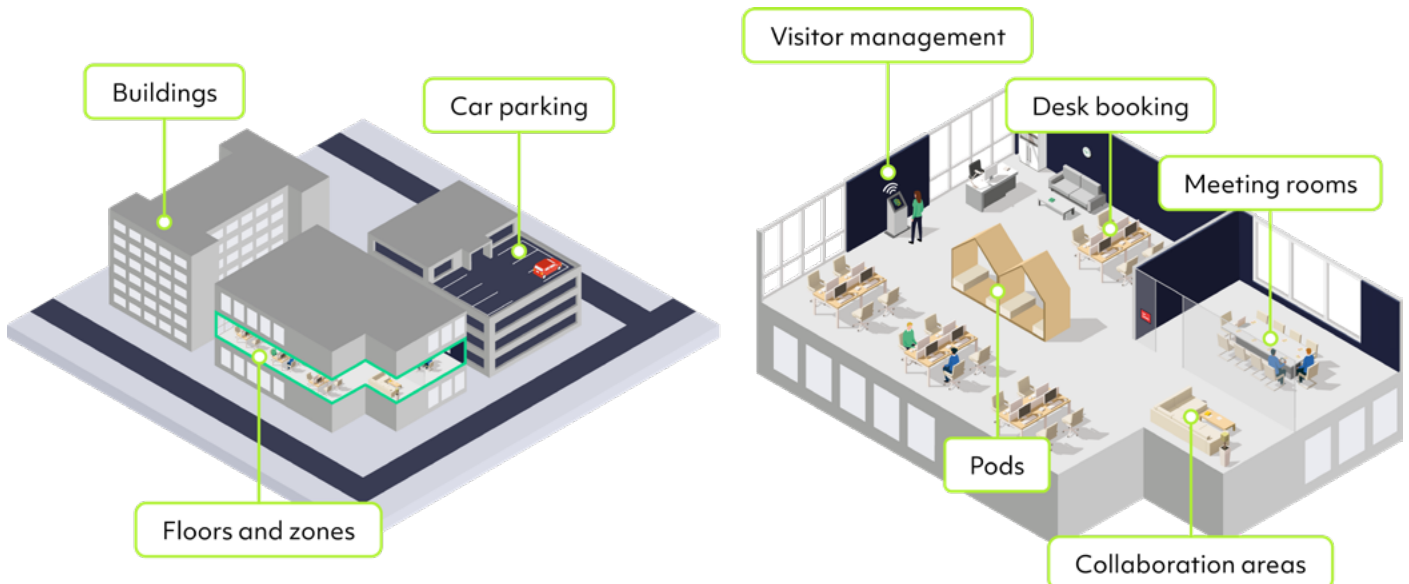

## Key features

- Create custom reports with our in-house team of data scientists.
- Export data and reports as PDF, Excel, or CSV.
- Set up and control access to reports for anyone within in your organisation.
- Data is securely stored in the EU using AWS.
- Compare occupancy and environmental data with booking data in one system.
- Cloud-based access to visualisations that can be viewed on large or small devices.
- Compare individual workspaces, floors, or buildings.

## Understand building occupancy and resource utilisation

See a detailed picture of how your estates are being used, and by who.
